Edinburgh, Scotland.

Data scientist with 4+ years of experience delivering analytics and data-driven insights for multinational clients. Currently pursuing a PhD in statistics at the University of Edinburgh with research focused on causal inference methods for large-scale healthcare and genomic data. Strong background in statistical modelling, machine learning, and data engineering with experience translating complex analysis into practical business outcomes.

Technical Skills

Programming: Python, R, Julia, SQL
Data Science: Statistical Modelling, Machine Learning, Causal Inference and Data Analysis.
Data & Visualisation: Tableau, Power BI, Looker.
Tools & Platforms: Git, GitHub, Cloud Platforms, Microsoft Office and Google Workspace.

Education

PhD Statistics
University of Edinburgh, Sep 2024 - Exp. Aug 2028
Research: Estimating causal effects from observational healthcare data in the presence of non-ignorable missingness. Applying Collaborative Targeted Maximum Likelihood Estimation (C-TMLE) to identify genetic variants with causal effects on disease outcomes using UK Biobank data.

MSc Mathematical Sciences, *Sep 2023 - July 2024*
African Institute for Mathematical Sciences
Class Representative

BSc Mathematics (First Class Honours)
Sep 2016 - July 2020
Kwame Nkrumah University of Science and Technology

Scholarships

School of Mathematics Funding Package
University of Edinburgh

Bending Spoons Funding
African Institute for Mathematical Sciences

Ato-Dadzie Foundation Scholarship
Kwame Nkrumah University of Science and Technology

Awards

Bending Spoons Scholar Award

The Edinburgh Award-Maths Outreach

Work Experience

PGR Ambassador, University of Edinburgh | Nov 2025 - Present
- Represent the university at postgraduate recruitment and outreach events.
- Deliver campus tours and support prospective student engagement activities.
- Facilitate and coordinate university recruitment initiatives.

Tutor (Mathematics & Statistics), University of Edinburgh | Jan 2025 - Present
- Provide academic support to undergraduate and postgraduate students.
- Deliver tutorials explaining complex statistical and mathematical concepts.
- Support coursework preparation, exam readiness, and analytical problem-solving.

Project Supervisor & Analyst, Polymorph Labs | Sep 2022 - Apr 2023
- Led quality control and management of educational platform content databases.
- Developed analytics systems to identify learning gaps and automate performance reports.
- Improved student engagement and comprehension by approximately 30%.

Data Scientist, Maverick Research | Nov 2021 - Aug 2022
- Conducted large-scale data collection and analysis across 15+ cities using automated scraping tools.
- Improved data accuracy by 20% through structured data cleaning and validation processes.
- Designed and implemented SQL database architecture, improving system performance by 12%.
- Delivered market insights for major consumer goods clients, including BIC, Unilever, and Fanmilk.
- Performed competitor pricing and market analysis, contributing to over 25% sales growth.

Data Analyst & Media Executive, Carat | Oct 2020 – Nov 2021
- Led analytics initiatives for major clients, including Microsoft, Betway, P&G, and Beiersdorf.
- Built data-driven media planning frameworks.
- Developed automated media planning templates, reducing operational workload by 20%.
- Optimised campaign strategies resulting in up to 30% cost savings.

Additional Experience

Financial & Data Analyst Intern, Dentsu | 2019.
